

## Curing Agent PR-38

A blend of polymeric aliphatic amine curing agent for use in water wipeable epoxy grout systems.

Curing Agent PR-38 offers excellent colour stability and is designed for use in tile grout.

Curing Agent PR-38 is non-toxic and recommended for use in the food service sector.

## Advantages

- *Good colour and colour stability*
- *Good water wipeable properties, tiles can be wiped down with a damp cloth to remove excess grout. (The excess grout should be removed before it starts to cure).*
- *The tools can also be cleaned with water*
- *Good chemical resistance*
- *“Non-toxic” – suitable for use in food factories*

### Technical Specification

<b>Colour</b>	Gardner 5 max
<b>Viscosity @ 20°C</b>	Less than 2 poise
<b>Amine value (KOH/g)</b>	310 – 340 mg
<b>Gel time @ 25°C</b>	25 – 36 minutes
<b>Mixing ratio</b>	100:50 w/w
<b>Loading usage</b>	50 parts per 100 parts of modified epoxy resin PR-5C
<b>Flash point</b>	Greater than 200°C (low risk)

## Handling Precautions

It is recommended that our Modified Epoxy Resin PR-5C should be used in combination with Curing Agent PR-38 to achieve the best results. Please refer to separate Health & Safety Data Sheet for Curing Agent PR-38.
